

Explanation

- Qf** Quaternary alluvial fan of Denniston Creek.
- Qtm** Quaternary marine terrace, 83,000 years old.

Figure 12. Sea cliff exposure of the alluvial fan deposits overlying the Stage 5a 83 ka marine terrace, Princeton, California. Enlargement is a close up view of the soil developed in the alluvial fan. Angular granitic clasts within the soil are used to correlate the soil across the base of Pillar Point marsh.
